

MEMORANDUM FOR: Deputy Director of Security (PTOS)

SUBJECT : Request for Unfunded Requirements

REFERENCE : Memo to Deputy Directors and Staff
Chiefs from D/Sec dtd 27 Mar 1967;
Same Subject

1. Based upon our current level of allocations and obligations for supplies and equipment as furnished to us by the Administration and Training Staff on this date, it is felt that only one item - the badge machine prototype - needs to be included in an office list of unfunded requirements.

2. Our proposed badge machine program is designed to achieve more positive personnel controls while at the same time enabling us to determine the possibility of reducing guard program costs at internal barriers. Deferment of this program will not only prevent accomplishment of these goals, but will also postpone our achievement of a substantive return from our present investment which, to date, amounts to \$126,000. It is felt the expenditure of \$64,800. for the purchase during the current year of a prototype machine for initial experimentation is mandatory if the program is to proceed on a timely basis and contractor initiative maintained.
